-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3,6,9,11-14, 24, and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lewis et al (U.S.P. 6,420,008) in view of Akram (U.S.P. 6,785,144). The patent to Lewis et al discloses an electrically active textile article comprising fabric (see col. 3, lines 55-58), a circuit on a flexible substrate 14, Fig. 1 (see col. 4, lines 59-60) secured to the fabric (see col. 3, lines 21-24), and at least one electronic component populating the circuit. It would have been obvious to construct the circuit with traces and pads as suggested by Akram (see col. 4, lines 51-62) since these traces and pads are commonly used in printed circuit boards to interconnect various electronic components. With regard to claim 9, note protective covering 12.

Claims 4 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lewis et al in view of Akram as applied to claims 1-3,6,9,11-14, and 26 above, and further in view of Bennion (U.S.P. 4,774,434). To construct the protective covering of Lewis et al from a waterproof material as suggested by Bennion (at col. 1, lines 61-64) would have been obvious since the circuit would be protected from malfunctioning in a wet environment.

Claims 7,8,15-23, and 25 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim.

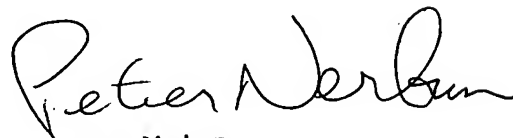

Applicant's election of the species illustrated in Fig. 5 in the reply filed on November 9, 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
